IN 1948 THE BUREAU OF LABOR STATISTICS INSTITUTED A PROGRAM OF SURVEYS IN WHICH OCCUPATIONS COMMON TO A VARIETY OF MANUFACTURING AND NONMANUFACTURING INDUSTRIES WERE STUDIED ON A COMMUNITYWIDE BASIS. THE EARLIER STUDIES WERE LIMITED TO OFFICE WORKERS BUT WERE EXPANDED BY 1951 TO INCLUDE PROFESSIONAL AND TECHNICAL, MAINTENANCE AND POWER PLANT, AND CUSTODIAL AND MATERIAL MOVEMENT OCCUPATIONS FOR 11 AREAS. SINCE 1961 IT HAS INCLUDED 82 AREAS. THIS DIRECTORY LISTS ALL OF THE PUBLICATIONS, WITH THE EXCEPTION OF OFFICE CLERICAL REPORTS, WHICH HAVE EMANATED FROM THIS PROGRAM TO DATE. INDIVIDUAL AREA REPORTS ARE LISTED BY STATE, BY METROPOLITAN AREA AND PERIOD COVERED, WITH BULLETIN NUMBER AND PRICE. COMPREHENSIVE BULLETINS COVERING THE AREAS THAT WERE STUDIED FOR EACH OF THE YEARS, 1951-52 THROUGH 1963-64, ARE LISTED AND PROVIDE DATA AND ANALYSES ON LEVELS AND TRENDS OF OCCUPATIONAL EARNINGS, AS WELL AS ON ESTABLISHMENT PRACTICES AND SUPPLEMENTARY WAGE PROVISIONS. RELATED ANALYTICAL ARTICLES THAT APPEARED IN THE "MONTHLY LABOR REVIEW" FROM 1948 THROUGH 1963-64 ARE ALSO LISTED. (FS)

A Directory of Community Wage Surveys, 1948—June 1965

Introduction

The Bureau of Labor Statistics instituted in 1948 a program of surveys in which occupations common to a variety of manufacturing and nonmanufacturing industries are studied on a communitywide basis.[1] The earlier studies were limited to office workers[2] but were expanded by 1951 to include professional and technical, maintenance and powerplant, and custodial and material movement occupations for 11 areas. By 1952, the community wage program included surveys in 40 areas, reached 61 areas by 1960, and since 1961 has included 82 areas.[3] In addition to individual area reports, summary bulletins have been published annually since 1952 (see p. 26), and since 1961 have presented estimates representing all Standard Metropolitan Statistical Areas in the United States. In addition to all-industry occupational averages and distributions, data are provided wherever possible for the six major divisions studied: Manufacturing; transportation, communication, and other public utilities; wholesale trade; retail trade; finance, insurance, and real estate; and services.

A majority of the survey reports also provide summaries of work schedules and supplementary benefits. Specific benefits studied varied somewhat from year to year, but generally included information on shift differentials; minimum entrance salaries for women office workers; scheduled weekly hours; paid holidays; paid vacations; paid sick leave; and health, insurance, and pension plans.[4]

---

[1] The origin of the Bureau's community wage survey program, the relation of area data to other types of wage statistics, and some of the possible uses of the community studies are discussed in an article entitled Community Approach to Wage Studies, Monthly Labor Review, October 1949, pp. 365–370. (Reprint 1971.)

[2] Office workers were studied in 1948 in San Francisco–Oakland, Denver, Atlanta, Chicago, Boston, Buffalo, New York, Dallas, Seattle, and Milwaukee; in 1949 in Los Angeles–Long Beach, Hartford, Washington, D. C., Atlanta, Chicago, New Orleans, Boston, Minneapolis–St. Paul, St. Louis, New York, Cincinnati, Cleveland, Portland (Oreg.), Philadelphia, Dallas, Richmond, and Seattle; and in 1950 in Los Angeles–Long Beach, Atlanta, Chicago, Indianapolis, Boston, Detroit, New York, Oklahoma City, Providence–Pawtucket, Memphis, and Milwaukee. These studies are not included in the list of reports beginning on p. 3.

[3] In 1964, the survey in Boise City was delayed until the following fiscal year.

[4] Rate of pay for holiday work was studied in 1954; nonproduction bonuses in 1952; overtime pay practices in 1954; wage structure characteristics in 1954, 1958, and 1963; and frequency of wage payment and pay provisions for holidays falling on nonworkdays in 1955.

The scope and method of survey are indicated in each bulletin. Among the items covered are the geographic and industrial coverage of the survey, the method of collecting the data, the method of combining the estimates, and definitions of supplementary benefits. Occupational descriptions used in collecting wage information are also included. Greater detail relating to Bureau-conducted wage studies is presented in Studies of Occupational Wages and Supplementary Benefits.[5]

This directory lists all of the publications, with the exception of office clerical reports, which have emanated from this program to date. Occupational Wage Survey bulletins provide data for plant as well as office occupations. The latest bulletin listed for each area is available at the price indicated from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C., 20402, or any of the Bureau's six regional offices listed on the inside back cover. Bulletins listed for previous years are available for reference purposes at leading public, college, or university libraries, or in BLS offices.
